(54) Title: TAPE TYPE ELECTRIC WIRE

Abstract:

This invention relates to a tape type electric wire of which outer side is coated with an insulator. This tape type electric wire has one side formed of an adhesive layer and the other sides covered with a passivation layer. In addition, the tape type electric wire includes a member for connecting a wire to another wire. This tape type electric wire is easy to use and its appearance is elegant. Further, this tape type electric wire can be used for an inner electric interconnection.
